## Step 2: Mount Your Optic So It's Rock Solid...

Mounting an optic can seem like an incredibly daunting task to a beginner...

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

...but DON'T BE AFRAID!

Just position your sight in a good spot on your rail...

...and make sure it is securely tightened down.

You want it's attachment to be rock SOLID because...

...YOU don't want your sight to work it's way loose when you're shooting!

The whole process of mounting an optic is especially EASY if you know a few of the old tips and tricks...

==> [Check out my article on HOW TO Mount Red Dot Sights by clicking this link](#)

It'll tell you where to place your sight and how to make sure it is tightened down properly.

### Step 3: Zero Your Red Dot At A Practical Distance

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

Once you have your optic properly mounted, you NEED to zero your optic. Here's the deal...

...there are a lot of distances (100 yards, 200 yards, 25 yards, etc.) that you can choose to zero your reflex sight, but...

...I HIGHLY RECOMMEND you choose a 50 Yard Zero. The 50 Yard Zero is SENSATIONAL distance because it is PRACTICAL and VERSATILE.

I delve in to this topic in detail in my article all about the 50 yard zero [that you can read RIGHT NOW by clicking on this link.](#)

Check it out, and FIND OUT WHY I think YOU should zero your optic at 50 Yards!

### Step 4: You Really NEED to...

... get out there and START SHOOTING!

Practicing your skills is how you improve as a shooter, but the real SECRET to improving your shooting is...

...practicing specific elements that will give you SPEED and ACCURACY!
