

The Holosun HS503C: The New POWER PLAYER and... ...Best Red Dot Sight FOR THE MONEY! (Red Dot Sight Reviews)

Hi RDshooters here,

I want to tell you about this THRILLING addition to the market place!

The **Holosun HS503c** is an absolutely FASCINATING optic.

I personally own TWO of them because this EXTRAORDINARY sight...

...gives you so much value at an AFFORDABLE price!

Let's begin with a short list of some of the REMARKABLE features you get when you buy this optic...

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

INCREDIBLE Battery Life!

One CR2032 battery can last you for 50,000 hours! Your Holosun will be **READY TO GO** for at least 2 years while being constantly turned on.

Water Proof Up To 1 Meter...

Your sight is **SAFE** to use even when it's raining outside. This is a **PRACTICAL** feature that any serious optic should have.

11 Brightness Settings...

This sight is incredibly **VERSATILE**. With it, you get 9 Daylight Brightness settings and 2 Night Vision Compatible settings.

You'll essentially have the capability of shooting in nearly every lighting condition!

ROBUST Construction!

But Here's A SECRET, This GROUNDBREAKING Holosun Red Dot Also Has...

...SOLAR TECHNOLOGY! That's right! The **Holosun HS503c** uses Solar Power...

...and while running on the POWER of the sun, this the optic AUTOMATICALLY adjusts the reticle to your lighting conditions!

This is a MASTERFUL play by Holosun because It really SIMPLIFIES your optic's required maintenance by extending its battery's life far beyond 50,000 hours!

IN FACT, you don't even need a battery in this optic when you're running on Solar Power!

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

And in my opinion, this SOLAR OPTION alone, makes the **Holosun HS503c** the **best red dot sight for the money.**

There is NO OTHER reflex sight even close to this price range offering...

...CUTTING EDGE Solar Technology that automatically adjusts your reticle!

With that said, there are times when you definitely want the option to adjust...

...your optic's level of brightness ON YOUR OWN. Well, fear not...

...because YOU can easily have COMPLETE CONTROL over this sight by SIMPLY switching it over to the manual setting.

From there, you'll use the push buttons on the side of the housing to INSTANTLY control your level of brightness.

But There's More! The SENSATIONAL Holosun HS503c Also Gives You...

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

...CHOICES over your reticle!

You get TWO RESPECTED reticle options that are both PROVEN to help you shoot FAST!

- **Option 1:** The 2 MOA reticle- It SIMPLIFIES your sight picture by giving you a CLEAN, CRISP, and NO NONSENSE view of your target! **OR...**
- **Option 2:** The **Holosun Circle Dot Reticle**- It uses the same SIMPLE 2 MOA dot in the center, but it's surrounded by a GENEROUS 65 MOA outer circle.

For me, the **Holosun Circle Dot** reticle is HANDS DOWN the way to go! The sizable 65 MOA outer circle gives you SHOCKING SPEED up close.

But at the same time, you have that CRISP 2 MOA dot in the center, which gives you PRECISE AIM at targets in the distance.

VERSATILE reticle options like these enhance this REMARKABLE sight's reputation as the **best red dot sight for the money...**

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

You won't find FUNCTIONAL options like these on many other optics, even those that are priced higher than the Holosun!

Bonus! This ELITE Holosun Optic Includes TWO VERSATILE Mounts!

INCLUDED with your sight, you'll find a **low mount** and a **high mount**.

With these TWO mounting options, your sight will be READY TO GO on any firearm INSTANTLY as soon as you receive it!

You won't have to go out searching for a riser that will fit your particular sight and your particular gun.

This can actually save you a lot of time and headache, but...

...it can also save you a lot of money because quality optics mounts can be expensive.

Now, with the **Low Mount**, you'll be able to use this incredible reflex sight on a variety of shooting platforms including...

- Shotguns
- Rifles
- Pistols
- Air Rifles
- Crossbows

And with the **High Mount** (A Lower 1/3 Co-Witness Mount) this Holosun becomes a perfect option for an AR 15.

All you have to do is Co-Witness your BUIS (Back up Iron Sights) with the optic, and then flip them

out of the way for a FAST sight picture through your Holosun.

This combination makes for a POWERFUL tactical set up that can OUTPERFORM many others in home defense.

So, if you are a...

- Recreational Shooter
- Sports or Competitive Shooter
- Hunter
- Defensive Minded Civilian or Sheepdog

...this Holosun is READY TO GO to fit your needs!

In the end, The Holosun HS503c Pros...

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

- It has ELECTRIFYING Battery Life...
- It's Solar Powered...
- It's READY TO GO with 2 INCLUDED Mounts...
- It's WATERPROOF up to 1 meter...
- You can change reticles between the SIMPLE 2 MOA dot and the EXCLUSIVE Holosun Circle Dot Reticle...
- It has a BARGAIN price...
- YOU get OUTSTANDING Customer Service from Holosun. I've contacted them!

Cons

- It's a little bit heavier than some other micro sights (but even then, its only by an ounce or two)

Final Verdict: Is this Holosun an ELITE Red Dot Sight Worth Buying?

Answer: YES!

- The Battery Life and Solar Power are IRRESISTABLE...
- With the 2 INCLUDED Mounts, you can be shooting almost INSTANTLY...
- And at it's price, it is an absolute BARGAIN considering all of it's PRACTICAL features. To me, it is with out question the **best red dot sight for the money!**

Final Rating: 4 out of 5 Stars

Holosun HS503C: F.A.Q.s

Q: Where can I find this Holosun for sale?

A: You can buy your Holosun HS503c from Amazon by clicking the link above! HURRY! You don't want to miss out on this INCREDIBLE BARGAIN! Order your Holosun TODAY!

Q: Does this optic have magnification?

A: No, but combining this Holosun with a magnifier is no problem at all, and that combination will allow you to easily extend your shooting distances.

Q: What is a Parallax Free Optic? Is the Holosun Parallax free?

A: Yes, the Holosun is parallax free with unlimited eye relief.

A Parallax Free sight allows you to shoot accurately when looking through the optic from any angle or head position.

This is essential if you're using it as a tactical optic because when you're moving and shooting quickly, it's difficult to put your head in the perfect position to make a shot.

Optics without this feature can cause you to miss your mark by several inches because the reflected reticle (or image) may appear in different places within your sight.

Q: Which is better? The Holosun 403 or the Holosun 503?

A: Basically, the Holosun 403 only has a 2 MOA dot reticle. The 503c gives you GREATER VALUE because you have the option of using that same SIMPLE 2 MOA dot OR the ACCLAIMED **Holosun Circle Dot Reticle**.

I definitely prefer the **Holosun Circle Dot** because it is EXPLOSIVELY FAST up close. Yet, it still has that PRECISE 2 MOA dot for shooting at smaller targets in the distance.

In the end, I think the Holosun 403 is a good optic, but because of the circle dot reticle, I think the **Holosun HS503C** is the **best red dot sight for the money!**

Q: What is a **2 MOA red dot** sight?

A: MOA stands for Minute of Angle. 1 MOA is about the size of an inch at 100 yards.

Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

So, a 2 MOA optic means that the small dot image you see, will cover about 2 inches worth of your target at 100 yards.

In my opinion, the **best red dot sights** are 1 or 2 MOA because they allow a strong shooter to be more PRECISE when shooting at greater distances.

Q: Is this a good **tactical reflex sight**?

A: It's one of the **best red dot sights** for tactical rifles:

- It's **AFFORDABLE!**
- It has **INCREDIBLE Battery Life** (and its **Solar Powered!**)
- Plus, it has _____ included. It comes **READY TO GO** straight on your AR 15
