

## **The Highly ACCLAIMED Aimpoint Micro T2...**

### **...DISCOVER Why It's Widely Regarded As The Best Red Dot Sight! (Red Dot Sight Reviews)**

Hi! RDshooters again...and let's get right to it!

The Aimpoint Micro T2 is a MASTERFUL optic.

To me, it is HANDS DOWN the best red dot sight on the market!

And I'm not alone in this thinking...

YES, there are many outstanding optics out there...

I've reviewed some of them here, and they offer AMAZING value...

But Aimpoint is a company famous for making some of the most RESPECTED optics IN THE WORLD.

And of all their sights, the **Aimpoint Micro T2** is the most ACCLAIMED sight they offer!

Just have a look at some of the THRILLING features YOU get when you buy this optic...

**Incredible Water Resistance!**

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

(Navy SEALs using iron sights: The Aimpoint Micro T2 would easily handle their dive)

This optic is submersible up to 80 feet (25 meters)!

This is a **GROUNDBREAKING** feature because the Micro T2 is so water resistant that you can literally go diving with it!

With that in mind, just think about how easily it can handle the rainy or wet conditions a civilian shooter might encounter.

### **Rugged Build Quality AND UNFORGETTABLE Reliability...**

Aimpoint reliability is legendary!

These **HARD HITTING** sights are built to be incredibly **POWERFUL**...

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

And to put it simply, the likelihood that this sight will fail you is as close to zero as it possibly can be!

### **Multiple Brightness Settings...**

With this sight you get 8 Daylight settings, 4 Night Vision compatible settings, AND 1 Extra Bright Setting.

So, you can use this amazing optic in virtually any lighting conditions!

### **Long-Lasting Battery Life!**

Your Aimpoint can give you over 5 years of battery life!

That means with just one CR2032 battery your sight will be ready to go for 50,000 hours!

And if you switch it over to Night Vision mode, you'll get an EARTH SHAKING 500,000 hours of battery life!

### **PLUS! The REMARKABLE Aimpoint Micro T2 OUTPERFORMS Other Red Dot Optics With...**

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

### **...its VIVID Lens Clarity!**

As we all know, seeing is a HUGE part of shooting...

And this optic has CUTTING EDGE lens coatings that improve the clarity of your sight picture.

So, instead of having a blue tint when looking through the glass (like many other optics), your view is extremely clear.

Additionally, the 2 MOA (Minute of Angle) dot appears INCREDIBLY CRISP when looking through this sight...

And this will help you make multiple shots at high speed when you're using it to shoot!

### **Another valuable feature is the Extra Bright Setting...**

With it, you can clearly see the sight's reticle while using POWERFUL laser protective glasses (kind of a military application actually). But also...

...you'll be able to see the reticle when you're shooting in an extremely bright location.

For me, this is an incredibly PRACTICAL feature because I live in the Nevada desert, and it can get blindingly bright when I go shooting during the summer.

### **But That's Not ALL! This UNFORGETTABLE Optic Is...**

## **Red Dot Shooters**

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

...possibly the most RUGGED Red Dot Sight in the world!

Now, there are some other really tough optics out there...

But Aimpoint's name is essentially synonymous with POWER and RELIABILITY!

You hear all the time from people who shoot guns for a living...

like Law Enforcement Officers, Military Trainers, and Top Competitive Shooters...

that they only TRUST Aimpoint!

This is because it's reliability is nearly unmatched with only a few alternatives that even approach it.

And the reason for this amazing reliability is the attention to detail Aimpoint puts in to their sight's construction.

Check out these details outlining the Aimpoint Micro T2's wonderful build quality...

### **Hard Anodized Housing...**

If you plan on actually using your rifle, your optic needs to be READY TO GO in bad weather...

And with the hard anodized housing, your sight will be WELL PROTECTED from any type of outside corrosion.

Additionally, it provides you with a non-reflective matte finish that will eliminate any reflections from coming off your sight.

### **Adjustment Turrets Are Protected...**

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

This is a MASTERFUL design feature from Aimpoint because your optic is set up from the factory for HARD USE.

You see, your sight's adjustment turrets can be EASY places for breakages...

but with this HARD HITTING optic, you'll never have to worry about that happening.

This is because the adjustment turrets are protected by the raised frame of the sight's housing.

In a way, they're recessed into the sight's body, making it very difficult for them to snap off after being banged around under hard use.

### **Incredibly Lightweight!**

The Aimpoint Micro T2 comes in at a SENSATIONAL 3.0 Oz. weight!

And this feature is even more INCREDIBLE when you consider just how STRONG this optic's overall construction is!

### **With The Aimpoint Micro T2 You Get INSTANT Credibility At The Range...**

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

---

Now, to be honest, this Aimpoint is not for everybody.

It's a premium optic that carries a price tag to match it's high performance.

But if you're looking to BE ONE OF THE FEW who runs the absolute BEST red dot sight on the market...

then the ELITE Aimpoint Micro T2 is for YOU!

And if you fall in to any of the following categories, I highly recommend that you consider choosing this optic...

- Law Enforcement Officer
- Military Serviceman
- Competitive/Sport Shooter
- Hunter
- Civilian Sheepdog (or in to Defensive Firearm Training)
- Recreational Shooter

## Red Dot Shooters

A PRACTICAL Guide To The World's Best Red Dot Sights!

<http://reddotshooters.com>

---

You CAN NOT go wrong in buying this CUTTING EDGE sight!

And it doesn't matter how you intend on using this optic either, because it's VERSATILE enough to be mounted on almost any firearm!

- Rifles
- Carbines
- Shotguns
- Submachine Guns/ Pistol Caliber Carbines
- Handguns

## In The End, The Aimpoint Micro T2 Pros...

- It has several Brightness Options including NV and the VERSATILE Extra Bright Setting.
- It's Submersible up to 80 feet!
- It has UNFORGETTABLE Reliability.
- It's Ruggedly Built with incredible POWER and STRENGTH.
- It's READY TO GO with 50,000 hours of Battery Life.
- It has VIVID Lens Clarity.
- It's light weight and ULTRA MOBILE.

## Cons

- It's a PREMIUM product with a premium price tag. It's not an optic for everybody.
- It doesn't come with a mount...So, you'll have to buy one separately (see the F.A.Q. section for a fantastic mount to pair with the Aimpoint).
- It doesn't have a Circle Dot Reticle. This is a personal preference for me, and I talk about the benefits of this reticle in my [Holosun Review](#). However, this is certainly not a deal breaker for me.

## Final Verdict: Does the PULSE POUNDING Aimpoint Micro T2 Live

## Up To Its Premium Price?

**Answer: YES!**

Its POWERFUL build quality and ruggedness is unmatched...

Its reliability is GROUNDBREAKING and YOU get 5 years worth of battery life...

And it has CUTTING EDGE lens clarity that can be used in practically any outside conditions on earth...

To me, it warrants its price and its ACCLAIMED reputation as the best red dot sight on the market.

**Final Rating: 4.7 out of 5 Stars**

**Q:** Where can I find this Aimpoint for sale?

**A:** You can buy your Aimpoint Micro T2 from Amazon by clicking the link above...

ACT NOW! And order your Aimpoint with CONFIDENCE because it is WITH OUT A DOUBT the best red dot sight on the market...

And REMEMBER, supplies are sometimes limited so DON'T WAIT! Order TODAY!

**Q:** The Aimpoint Micro T2 is a great optic, but are there any alternatives that are less expensive?

**A:** As I said, I think the Aimpoint Micro T2 is the best sight available...

HOWEVER, that doesn't mean there are not other SENSATIONAL optics on the market!

So, if you're nervous about the price of the Aimpoint, I highly recommend you check out my full review of the [Holosun HS503c](#).

For me, the Holosun is a BARGAIN, and I think it's definitely the best red dot sight for the money!

**Q:** Is the Aimpoint Micro T2 a good AR optic?

**A:** Absolutely! It's POWERFUL and RELIABLE. However, it doesn't come with a lower 1/3 Co-Witness Mount.

That's something you'll have to purchase separately. I Recommend the Daniel Defense Aimpoint Micro Mount.

It's an IRRESISTIBLE mount to go with your PREMIER Aimpoint optic, and you can [PURCHASE ONE from Amazon by Clicking This Link](#).
